

VELTOP Sun Ride Instructions of use

Thank you for your choice of our VELTOP SUN RIDE model.

The conception of the product, its manufacturing and assembly has been made by CYCLO-SYSTEM in France.

To make sure of a satisfactory use, a good function and a long life of the accessory, please read and follow attentively the instructions of use and assembly.

The target of the VELTOP SUN RIDE is to protect the user by sun.

The device should not be used on none tarmac tracks and is not recommended for cross-country rides.

This version can be installed on nearly all recumbent models equipped with a luggage carrier on the back or on the seat tube armature.

Warning

The non-respect of the instructions of use could be a hindrance for a good function of the protection and cause a failure of the different pieces.

Choice of two rear fixations

Carrier fixation

Seat tube armature fixation

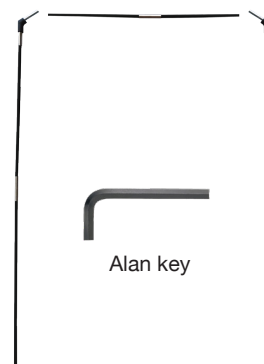

Product contents

Yellow or grey canopy

Yellow or grey storage bag

3 poles in 2 parts to maintain the canopy horizontally

Plate

2 front rigid straps to be fixed on the frame to maintain the canopy vertically

2 white poles to increase the length of the rigid straps, if necessary

1 Installing of the adaptation back

Installing of the adaptation on the luggage carrier

Unscrew 2 out of 3 screws of the adaptation piece (leave one beside) and set the upper part (with the tube) on top of the luggage carrier; the low part is positioned under it; then tighten with the help of the screws.

This adaptation should normally be fixed on the end of the luggage carrier in order not to hinder to install luggages on the sides or on top

Installing of the seat tube armature

Set the brackets onto the high part of the tube armature of the seat.

2 Fixation of the plate with the storage bag

The plate with the storage bag should be positioned parallel with the one of the luggage carrier fixation or the one of the seat armature, then tighten the 2 nuts.

For the fixation on the tube armature of the seat, tighten the 2 nuts on the plate of the storage bag on the bracket.

3 Fixation of the storage bag

Place the storage bag on the plate in the middle and screw on the two nuts.

4 Installing of the canopy

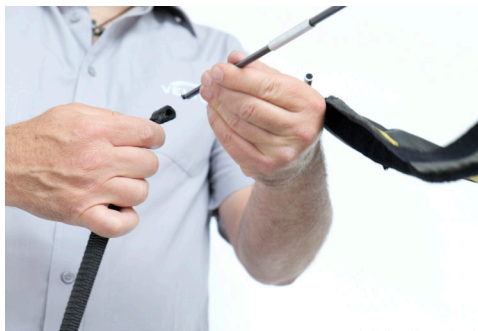

Place the 2 hoops in the soft top before inserting them in the rear pannier.

Connect the canopy to the storage bag using Velcro.

Installing the horizontal poles and vertical rigid straps

Insert the loop from the top end of the 2 vertical rigid straps into the horizontal pole of the canopy on each side. Connect the horizontal pole to the 2 poles holding the canopy in place, then insert the loop from the 2 vertical straps into the metal connector at each end.

On the top, the canopy must be hold with the help of the VELCRO strips.

Put the transparent protection around the frame, before installing the low fixation system on it.

Insert the bottom of the two rigid straps into the loop of the male clip before locking with the Velcro fasteners. Connect the male attachments of the canopy vertical straps to the female attachments. For 2-wheel recumbents, position the clips on the derailleur support tube.

Adjustements

In order to respond to the different sizes of the recumbent users as well as the different lengths or models of the trikes, it is possible to modify in height of the rear adaptation.

If needed push the rear adaptation to its highest position.
You can also change the position of the rear bag, either forwards or backwards.

You can also adjust the length of the front vertical rigid straps.
Insert the white poles inside (5 inch)

The canopy should be at an approximate distance of 5 cm (2 inch) from the rider's head.

Precautions

Do not iron the canopy (100% polyester) and refrain from washing to keep the waterproof.

If you transport your trike outside the car, take off the canopy.
When parking or using the trike by strong wind or storm, the canopy should be retracted.

Using the protection in extreme weather conditions is not advised. In such a case, postpone your trip or dismantle the system when continuing the route.

Enjoy your **VELTOP** device and its comfort of use.
